UltiTorque™ Torque Arm & Torque Tube

## Choose the UltiTorque™ Torque Arm and Torque Tube

- Maximize productivity and increase quality control
- Accommodate standard and custom tooling
- Handles wide range of torque capacities
- Smooth, effortless movement with virtually no resistance

## UltiTorque™ Torque Arm and Torque Tube Features

### Superior Performance and Safety

- Both custom and standard designs
- Zero gravity flotation
- Alleviate torque reaction exposure
- Increase fastening precision and consistency
- Variety of mounting options
- Power Down Assist Option

*Manipulative behavior you'll thank us for.*

### Exceptional Quality

- Durable powder coated finish
- Sealed precision bearings provide long life, smooth motion and less maintenance
- Includes air regulator/filter with lockout valve
- Engineered for minimal deflection
- Designed with 3D modeling software for customer pre-approval and manufacturing reliability

# UltiTorque™ Arm and Tube

Fluid movement and zero-gravity flotation allows operators to achieve precise tool placement with the UltiTorque™ reaction arm system. Standard and custom models accommodate a wide range of torque reaction. Utilize a customized machine for unique applications.

Versatile mounting options and customized capabilities allow this system to fit into any work environment.

## UltiTorque™ Models:

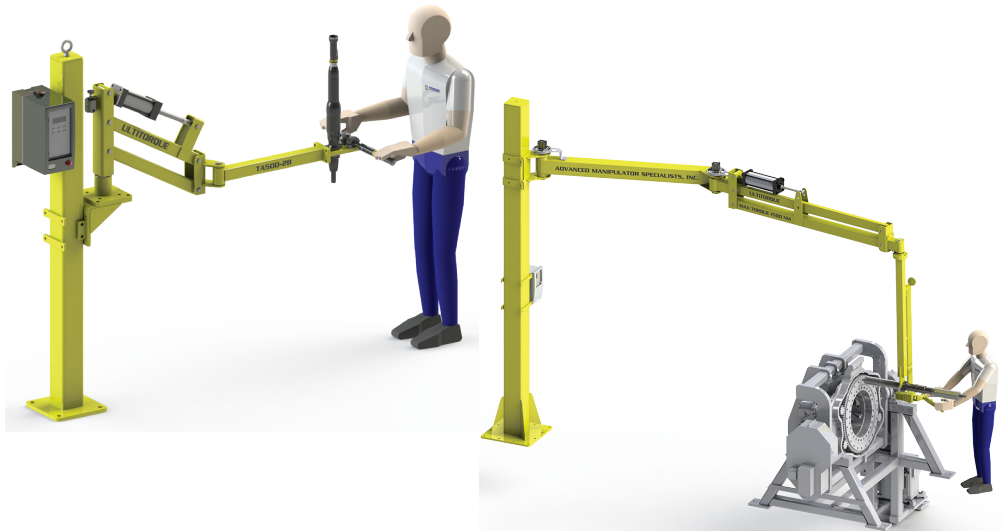

- Spring Controlled
- Linear Rail
- Pneumatic Balancer
- Torque Tube
- Custom Engineered

## Options:

- Rigid or Rotating Tool Interface
- Horizontal or Vertical Tool Holder
- Mounting:
  - Overhead Rail
  - Bridge
  - Jib Crane
  - Articulating Jib Crane
- Power Down Assist (PDA)

100% Designed,  
Manufactured &  
Assembled in USA
