UltiPress™ Press Brake Manipulator

Designed for Performance, Safety and Productivity

Choose the UltiPress™ Press Brake Manipulator

- Safely and Effortlessly Pick, Lift, Bend, Rotate and Position Sheets of Metal
- Keep The Operator Safe, Product Integrity Intact and Manufacturing Process Efficient

UltiPress™ Press Brake Manipulator Features

Superior Performance and Safety

- Standard float mode for ultimate product placement
- Able to produce regular and reverse bends
- Anti-drift brakes prevent unwanted movement when machine is not in use
- Custom-designed controls for optimal user comfort and efficiency
- Pressure switch controlled valves prevent unwanted-downward motion in event of lost air supply
- Ultimate stability and product placement achieved with rigid support and customized engineering
- Low-maintenance system
- Easy installation

Exceptional Quality

- Durable powder coated finish
- Sealed precision bearings provide long life, smooth motion and less maintenance
- Includes air regulator/filter with lockout valve
- Engineered for minimal deflection
- Designed with 3D modeling software for customer pre-approval and manufacturing reliability

Manipulative behavior you'll thank us for.

UltiPress™ Press Brake Manipulator

Fluid movement and zero-gravity flotation allows operators to achieve precise product placement with the UltiPress™ Press Brake Manipulator. Fully customizable machine and end-effector accommodates unique applications.

Whether outfitting new press brake systems or retrofitting legacy lines, this press brake manipulator system is engineered to plug seamlessly into your workflow. From single-axis sheet handling to synchronized lift and roll systems, the fully customizable UltiPress™ will ensure operator safety, product integrity and manufacturing efficiency.

Versatile mounting options and customized capabilities allows this system to fit into any work environment.

Mounting Options:

- Floor pedestal
- Fixed overhead
- Overhead trolley
- Building column
- Portable base

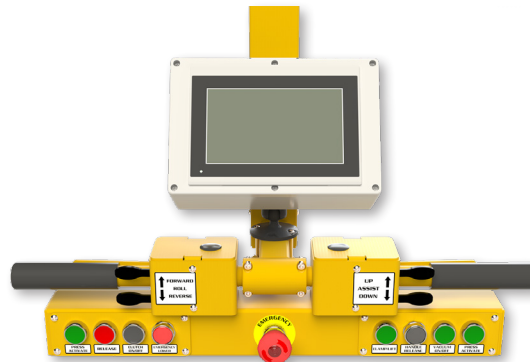

100% Designed,
Manufactured &
Assembled in USA

Made in USA

IT'S TIME TO GET MOVING

UltiPress™ Operator Control Console

The UltiPress™ console gives operators complete control of material manipulation throughout the entire press brake forming process. The control system is designed with modularity in mind:

- Ergonomic joystick levers, designed for gloved operation
- Variable/infinite speed controls on the joysticks
- Mountable to fixed or articulated support arms
